

KONIN JEAN EUDES KABLAN

LICENSE MANAGEMENT EXPERT | SOFTWARE ASSET MANAGEMENT | IT OPERATIONS

Budapest, Hungary | +36 20 532 3072 | jeaneudesk225@gmail.com | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

License Management and IT Operations professional with 9+ years of experience in enterprise software license governance, software tracking, cost optimization, compliance, reporting and end-user technology operations. Hands-on experience managing **Microsoft, Adobe and Kofax portfolios**, coordinating license requests and approvals, monitoring utilization and producing management reporting. **ITIL 4 certified** with ServiceNow, Flexera FNMS, SCCM/Intune, CMDB and Power BI expertise. In Senior IT Operations, troubleshoot WTS applications and complex software/endpoint incidents, coordinate remediation, document solutions and maintain service continuity.

CORE COMPETENCIES

- Software License Management & Lifecycle | License Tracking & Reconciliation | Software Demand / Request Management
- License Compliance & Audit Readiness | Cost Optimization | CAPEX/OPEX Awareness | Risk Analysis
- Cost Center & System Owner Coordination | Annual Software Tracking | License Reporting & KPI Dashboards
- License Governance & Policy | Software Asset Management System Operations | Change Documentation
- ServiceNow Ticketing | Incident / Problem / Change Management | WTS Application Troubleshooting | End-User Services
- Microsoft 365 / Microsoft Licensing | Adobe Licensing | Kofax | Flexera FNMS | SCCM | Intune | CMDB
- Power BI | Azure | VMware | Citrix | Active Directory | Cisco Meraki | Cross-functional Stakeholder Management

PROFESSIONAL EXPERIENCE

Tata Consultancy Services (TCS) — Budapest, Hungary

Senior IT Operations / IT Endpoint Operations Engineer (Generali via TCS) | 2024 – Present

- Troubleshoot WTS applications, enterprise software, endpoint and infrastructure incidents, ensuring timely service restoration and alignment with SLA and IT control requirements.
- Act as an escalation point for complex WTS/application issues, performing structured diagnosis, coordinating resolver teams, tracking remediation and communicating status to stakeholders.
- Document troubleshooting procedures, known errors and remediation steps in internal knowledge bases, contributing to a 30% reduction in recurring incidents.
- Coordinate software installation, endpoint configuration and proactive license/usage monitoring across user devices, supporting controlled deployment and compliance.
- Use ServiceNow Incident, Problem and Change processes to track actions, document implemented changes and maintain operational traceability.

Software Asset Manager / Service Operations Lead (TotalEnergies via TCS) | 2019 – 2024

- Managed enterprise software license governance and tracking for Microsoft, Adobe and Kofax portfolios, covering utilization, lifecycle, compliance, requests and cost control.
- Designed and implemented license governance practices **achieving 100% compliance** and **20% cost savings** through improved utilization, reconciliation and license optimization.
- Coordinated software demands and service requests with Business Units, Security and Finance, validating requirements and supporting approval and allocation decisions.
- Performed annual and periodic software/license tracking activities, analyzing quantity, utilization, compliance and cost information to support management decisions.
- Produced periodic license, compliance and cost reports and automated Power BI dashboards, improving management visibility and leadership decision-making.
- Conducted internal audits and risk assessments, identified non-compliance and coordinated remediation while maintaining audit readiness.
- Processed and validated compliance and service requests **with 95% SLA adherence** and maintained documentation of governance actions and implemented changes.
- Supported continuous improvement of software asset management processes, reporting and controls in line with ITIL practices and business requirements.

NOKIA via Valsch Consulting — Abidjan, Côte d'Ivoire

RNO and Drive Test Engineer / Telecoms Engineer | 2017 – 2018

- Performed GSM/LTE testing and troubleshooting to resolve network incidents effectively.
- Collected and analyzed technical performance data and delivered reports to stakeholders.
- Supported infrastructure maintenance and issue resolution activities.
